

Child Safety Seats

Is yours installed correctly?
Do you want to have it checked just in case?

Although 96% of parents believe they install and use their child safety seats correctly, 90% of child safety seats are not installed and used correctly. Shelby County Fire and Rescue cares about your child. We have a Certified Child Safety Seat Technician on staff to help you ensure the safety of your child. Our technician can assess your seat for age- and size-appropriateness, proper installation and use, recalls and visible damage. This service is free of charge.

If you have questions or need help with child safety seats, please call us.

Don't take chances with your most precious cargo.
